

AircraftAdmin.ca

AircraftAdmin.ca is brought to you by Visions Encoded Inc. The purpose of this software is to assist your company in keeping track of when maintenance is required for your aircraft . Our aircraft maintenance administration service has been created in close cooperation with the highly successful, fight-training school, Harv's Air, located in Steinbach, Manitoba.

Core Features

- Reminds appropriate personal of upcoming aircraft maintenance required, both within the application and via e-mail
- Warns appropriate personnel of aircraft maintenance imminently due, both within the application and via e-mail
- Sends a critical alarm regarding aircraft maintenance overdue, both within the application and via e-mail
- Keeps track of run-time hours for each aircraft
- Keeps track of run-time for items on an aircraft
- Can track an independent runtime for an item on an aircraft (i.e. an item with a Hobbs timer)
- Can add/edit/discontinue tracking of items (e.g. if a new Airworthiness Directive comes out)
- Produces and prints aircraft items-due/current status report
- Produces and prints aircraft maintenance work orders
- Keeps records of dates/times when aircraft maintenance is performed
- Automatically resets the next lead-time and alarm trigger points (time-at-next-inspection or due-date) for items that have just been completed
- Is accessible anywhere, anytime that an Internet connection is available
